PROJECTS

IT Tech User Manual -

<https://jigatechusermanual.netlify.app>

Onboarding reference site for new hires in an IT company environment. Guiding them through company tools, systems and day to day processes in a clean layout

Co. Café Application -

<https://cocafe.netlify.app>

Full café management app with inventory tracking, sales reporting, daily cleaning checklists, and wholesale order forms. Stores data locally per device with import/export support.

Pucksort - Hockey Team Manager -

<https://pucksort.netlify.app>

Roster tool for recreational hockey leagues that builds a player pool and automatically splits it into two balanced teams by position.

EXPERIENCE

Tech-Focused Barista Co. Innovation Centre <i>St. John's, NL</i>	2026 – Present
--	----------------

- Independently planned, designed and built a React inventory management app tracking 100+ products alongside daily sales and task logging, replacing a shared spreadsheet
- Supported café operations including wholesale ordering across 5 vendors, event setup, and hiring
- Contributed to social media strategy through content creation and promotion of café offerings
- Prepared coffee and food orders while building relationships with Innovation Centre professionals through in-depth conversations on AI, emerging software, and industry trends
