WRDC - Creating a Respectful Workplace

EXPERIENCE

Tech-Focused Barista Co. Innovation Centre 2026 – Present

St. John's, NL

- Developed a React inventory-management application to track sales, daily tasks, and product inventory for the café.
- Supported café operations including event setup, wholesale ordering, and hiring for open positions.
- Contributed to social-media strategy by creating posts and promoting café offerings.
- Prepared coffee drinks and food orders for customers and office-building residents.

PROJECTS

IT Tech User Manual

<https://jigatechusermanual.netlify.app>

React · JavaScript · HTML · CSS

Onboarding reference site for new hires an IT company environment, guiding them through company tools, systems and day to day processes in a clean layout

Co. Café Application

<https://cocafe.netlify.app>

React · JavaScript · HTML · CSS

Full café management app with inventory tracking, sales reporting, daily cleaning checklists, and wholesale order forms. Stores data locally per device with import/export support.

Pucksort - Hockey Team Manager

<https://pucksort.netlify.app>

React · JavaScript · HTML · CSS

Roster tool for recreational hockey leagues that builds a player pool and automatically splits it into two balanced teams by position.
